CONNECTING FOR HEALTH ____ SM

MARKLE FOUNDATION[®] A Public-Private Collaborative

Common Framework for Networked Personal Health Information Statement of Support

Consumers need to be full participants in modern health information tools and services to help them prevent illness, communicate better with clinicians, understand costs and treatment options, make better health decisions, and take better care of loved ones.

The Markle Connecting for Health Common Framework for Networked Personal Health Information defines a set of practices that, when taken together, can enhance consumer participation and protect personal information.
